

# Welcome to Rapid Antigen Testing as a Follow Up

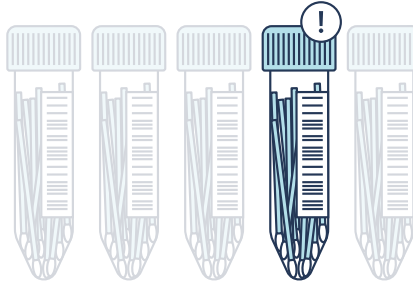

1.

## Prepare for Testing Day

- Review the rapid test's Instructions for Use and Emergency Use Authorization.
- Read and understand the onboarding materials.
- Know where your follow up testing will take place.
- Collect consents for each participant.
- Collect the necessary supplies for test day.

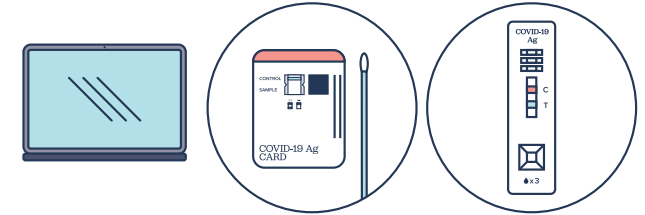

2.

## Identify & Inform Positive Pools

- Positive pool results are communicated to the Test Champion.
- The Test Champion isolates the positive pool, providing care and reassurance by sharing next steps.
- The Test Champion organizes follow up testing at school for that same day. This can take place in the classroom of the positive pool or in a designated isolation room.

3.

## Register Test Takers

- The Test Taker checks in.
- A test kit is registered and assigned to the Test Taker.

4.

## Sample Collection

- A sample is collected from the Test Taker, applied to the cassette, and the timer is started.

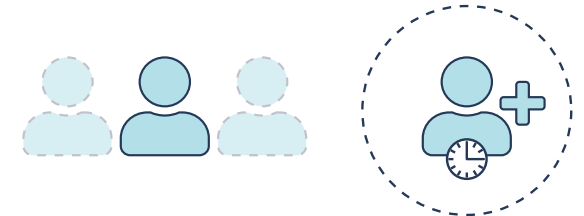

5.

## Interpret Results and Report

- The result is read and interpreted. The result is then recorded in the portal.

6.

## Care for Positive Students – Get Back to Learning

- The Test Champion communicates the result to the parents.
- The Test Champion uses care and compassion to isolate the positive student and send them home.
- The students that test negative can return to their classroom.
